**Exposure** The Exposure setting controls how light or dark an image appears. The greater the Exposure number, the lighter the image appears, and the smaller the Exposure number, the darker the image appears. You may find the Exposure control under the Basic tab or on the Adjustments panel (figure 9.7). ****Figure 9.7**** : Using the Exposure control ****Settings**

Recommendation** The Exposure control is usually found in the Basic tab and is the most used adjustment in the program. Take plenty of images in various Exposure settings and create a library of your exposure settings for future use. Most of the time you use the Exposure adjustment, you'll see a change in the Exposure slider icon. If you want to use the Slider tool to make adjustments, click the icon, and the slider appears. You can use the slider to create a custom setting or change to the default setting.

It is time for my annual preview for the Buffalo Bills. Hopefully, I don't make the same mistakes I did last year and get something right. This is more for entertainment than anything else as I know the outcome of the season and I have no feeling about the team. The Bills should be ecstatic that they are playing in the home opener on Monday Night Football versus the Atlanta Falcons. That's as good of an opener as you are going to get. The Bills will need to out score the Falcons by at least three touchdowns to win. If this happens, the Bills will be just one win away from becoming bowl eligible. If they aren't they will have to catch a few breaks to get there. Let's start with the whole "QB controversy". Tyrod Taylor is our starter and we all know that he isn't the elite QB everyone wants him to be. With that said, he has proven he can go out and put up points. Tyrod is a turnover machine and that has to stop. In his two years as a starter he has 16 interceptions

and in the 2014 regular season he threw for over 18,000 yards and 30 touchdowns. The best part of all these stats is he did it without help from defenses and always did it against elite defenses. Against the current Miami Dolphins front 7 he only threw seven picks with over 700 yards. In a strange turn of events, he threw over 300 yards against the the New England Patriots and a league leading 4 interceptions. He is a solid QB and he is what the Bills have. Buffalo's sophomore QB is Nathan Peterman. He had his moments and he was really good against the Miami Dolphins. He threw for nearly 300 yards and two TDs. He also had two picks and did everything you want from a young QB. He wasn't rattled and even led the team into the end zone to start the fourth quarter. He is young and we will see if he can keep it up. Peterman actually has his own Twitter page where you can follow him. He is pretty active so take a look if you are bored or want to see what he is doing. My guys. The two best running backs in the NFL: LeSean McCoy and Frank Gore. McCoy is a great fit in this Buffalo offense and it is no

wonder why he is the face of the franchise. He is a solid running back and is best used between the tackles. Even though he doesn

Brushes look like pens, though they can do much more than a normal pen or marker can. You can draw using a brush, erase with a brush, resize with a brush, and even use a brush to paint areas of an image that you later want to enlarge or reduce by using layer masks. Brushes are accessible through the Brush panel, though you can also access them through the Brush menu and the Brush icon that appears on the tool bar when you have one selected. To choose a new brush, click the Brush pop-up menu in the Brush panel. The Brush Control Strip includes a set of options that control the brush when it is selected. You can also change these options using the Brush Settings dialog box (Window > Brush Settings or the Brush setting from the Brush menu). The two types of brush that you can use with a Photoshop image are erasers and pens. You

use the Eraser tool for erasing. You can also use the Eraser tool to blur images. To erase, click the eraser tool and drag the tool up and down to erase pixels. The Pen tool is similar to the Brush tool; it has a line that you can draw on an image with a variety of different types of lines (see Pencil, Ink, and Pencil Sketch (Ki-based)). You can draw with the Pen tool to create lines and shapes that you can later modify. You can resize the shape or delete it entirely. You can also fill in areas that you draw with a brush or other shape. You can draw on a different area of a Photoshop image by selecting a different area with the Direct Selection tool. To select another area with the Direct Selection tool, click a selection box, marquee, or boundary tool and drag the mouse to another area. (Note that this is very different from a Spot Healing Brush, which uses the Pixel Matching feature to fill in a smaller area in the image. For more information on the Pixel Matching feature, see Using the Pixel Matching feature in the "Photoshop CS5: Patching problems with the Pixel Matching feature" section.) After you've

drawn a shape using the Pen tool, you can fill the shape using one of the following tools: The Paint Bucket tool can be used to fill a selection box. The Watercolor brush can be used to fill a shape with a pale color, and to blend the fill with other colors. The Brush tool can be used to paint with
