KeyMACRO is a software for those who like to use a keychain manager with a Mac. The program allows you to track and manage numerous passwords, create and modify various folders, remember the time and date of each entry, monitor their expiration, create text files for each entry and, most importantly, it is super easy to recover a forgotten password! The intuitive and convenient interface of

KeyMACRO works even better with the on-screen keyboard which can be displayed when you like. Also, you can get an individual window for each category, or move the whole application to your Dock.

Security and encryption of the data are very important. The program is delivered with a strong AES algorithm which allows you to use an unlimited number of passwords and tracks all of them. With KeyMACRO, you get an opportunity to track, save and

manage the passwords you use for different services on the Internet or your favorite application. What's more, the program is capable of notifying you when one of your accounts has been accessed, hacked or otherwise compromised. The application provides you with an option to protect your data with the help of a password generator. Choose from a wide selection of languages and generate strong passwords for the included accounts. When it comes to managing files,

KeyMACRO can help you quickly open multiple files and do some basic operations on them. While you work, you can easily sort, search and filter the entries. So, if you keep getting a lot of unwanted pop-up notifications or you need to find the password of the last used FTP account, KeyMACRO is just the right solution for your need. KEYMACRO Features: Support for multi-accounts. Generate passwords and account names. Password manager. Password generator. Strong data
